Summary

- * Full-stack JavaScript and Java developer with a strong passion for programming.
- * Transitioning from eight years in the appliance repair industry which utilized problem solving skills and adaptability.
- * Excited and eager to learn new things to push my abilities and overcome challenges of solving complex problems as a valued member of a great development team.

Recent Projects

Capstone Project - July 2017

This is where I will briefly describe how awesome my capstone project is, and describe my main roles and languages used in developing it.

Texas Affordable Appliance - June 2017

A project to help a local appliance repair company build a web presence with a website. I built this site from scratch including all content and images.

[HTML](#) | [CSS](#) | [JavaScript](#)
[jQuery](#) | [Bootstrap](#)

Adlister - June 2017

A web app that allows users to create accounts and view, create, and browse ads created by users. By integrating the MySQL database I was able to store, update and pull user account and ad info to create this dynamic web app.

[Java](#) | [MySQL](#) | [JSP](#) | [JSTL](#)
[HTML](#) | [CSS](#) | [Bootstrap](#)

Simple Simon - May 2017

A Simon memory game clone that is mobile responsive and implements features like high-score and standard and reverse levels. All logic and animations for game are written in Javascript and JQuery.
